

## **2018 FFIEC CENSUS FILE INFORMATION**

- File is for HMDA/CRA processing year: 2018
- Number of records: 75883
- Census tract numbers for the entire nation, Puerto Rico and four Island Areas are represented on this file.
- Census tract numbers are from the 2011-2015 American Community Survey.
- The Census Bureau released the summary files for the four Island Areas (Guam, US Virgin Islands, etc.) in June 2013. Therefore, the 2018 FFIEC Census File includes demographics for the Islands areas necessary for CRA/HMDA purposes.
- The Census Bureau released the Urban/Rural block level data in September 2012. Therefore, the 2018 FFIEC Census File includes the Urban/Rural flag.
- Metropolitan Statistical Area/Metropolitan Division (MSA/MD) definitions are for the edit processing year indicated.
- Small counties are counties with a population of no more than 30,000. Small counties have 999999 in the census tract field and 'S' in the Small County Flag field. The individual tracts are also represented in this file for small counties and are flagged 'S'. Island Area tracts are flagged 'I'.
- If the Demographic Data Flag contains an 'X', the persons/population and/or median family income (tract level) is zero or data were suppressed by the Census bureau for reasons of confidentiality. Island Area tracts contain 'I' in this flag.
- Principal Cities are indicated in the 2018 FFIEC Census data release. Principal City definitions are dependent on Office of Management and Budget data adopted in the 2018 Census file.
- What in previous data releases had been known as HUD Estimated Median Family Income is now known as FFIEC Estimated Median Family Income.
- Median incomes within MSA/MD boundaries are the MSA/MD Median Family Incomes. Those median incomes outside of MSA/MDs (MSA/MD=99999) are the Median Family Incomes for non-metro areas of the state.
- Starting with 2017, the FFIEC Census File uses the 2011-2015 American Community Survey (ACS) for its demographic fields. This contrasts to previous years when the FFIEC Census used 2006-2010 ACS for the majority of its demographic fields, with selected 2010 Census Summary File 1 tables used for population related fields.

### **Instructions on performing edit verifications of MSA/MD /state/county/tract combinations:**

- The MSA/MD code will equal 99999 if the state/county/tract falls outside of a Metropolitan Statistical Area/Metropolitan Division.
- Refer to the HMDA or CRA edits to understand the logic of verifying geographic code combinations. The edit logic for HMDA and CRA differ slightly. (You may also request a copy

via electronic mail at [hmdahelp@frb.gov](mailto:hmdahelp@frb.gov) and/or [crahelp@frb.gov](mailto:crahelp@frb.gov) or via Internet at [www.ffiec.gov/hmda](http://www.ffiec.gov/hmda) and/or [www.ffiec.gov/cra](http://www.ffiec.gov/cra).)

Notes:

Geographic and other changes in the 2018 FFIEC Census File:

1. **FFIEC Estimated Median Family Income**-Data and geographies used by HUD in the calculation of HUD MFI are described on documentation linked from this page: <https://www.huduser.gov/portal/datasets/il.html>. However, since the ACS estimates used by HUD do not include the revisions to the MSA/MD delineations released by OMB in August 2017, MFIs for the following geographies were calculated by the FFIEC, and are included for the first time in the 2018 FFIEC MFI data:

- a. New Metropolitan Statistical Area: Twin Falls, Idaho (MSA 46300, consisting of Twin Falls city, code 82810; Jerome county, code 053 and Twin Falls county, code 083)
- b. Non-Metro Area of Idaho

Please see [FFIEC Estimated Medians](#) section in the Appendix for more details.

Beginning 2004, Census race category “Some Other Race” is no longer collected for HMDA. “Some Other Race” should be added into the category “Two or More Races” for HMDA reports.

Beginning 2003, OMB's civil rights monitoring guidelines are used with HMDA reports.

All of the 366 underwater tracts (tract => 990000 and tract not equal to 999999) are included on this file.

Summary of Census counties:

	State	County	Metro. Counties	Non-Metro. Counties	MSA*	MD in 11 MSA
United States	51	3142	1169	1973	383	31
Puerto Rico	1	78	69	9	7	
Island Areas	4	13		13		
<b>Total</b>	56	3233	1238	1995	390	31

\*HMDA/CRA MSA count = Total MSA count – MSA with MD count + MD count = 390-11+31=410

There are no split tracts in the 2018 FFIEC Census File.

For HMDA purposes, it is optional for a HMDA reporter to code census tract numbers or ‘NA’ for small counties. If an institution is both a HMDA and CRA reporter, refer to the census tract reporting section in Appendix A of the HMDA Getting It Right Guide.

For CRA purposes, 1998 was the first year that a CRA reporter could code census tracts in any county as ‘NA’. This option is used if the business or farm can only provide a Rural Route or P.O. Box for its address and the institution is not able to determine a geocode based on the information provided.

American Samoa, Guam, The Commonwealth of the Northern Mariana Islands, and the Virgin Islands are not valid for HMDA purposes (used for CRA reporting only). Population and housing data for

these Island Areas are included. The Island Areas use different surveys than the U.S.; therefore, population and housing items may come from different census table numbers. The 2018 Census file uses the 2010 Island Area surveys. The list below shows these items and their corresponding census tables.

Field Name	U.S.	U.S. Virgin Islands	American Samoa, Guam, The Commonwealth of the Northern Mariana Islands
Persons/Population	B01001(1)	SF.P1(1)	SF.P1(1)
Total Housing Units	B25001(1)	SF.H1(1)	SF.H1(1)
Households, count	B19001(1)	SF.PBG46(1)	SF.PBG48(1)
Median Household Income (tract level)	B19013(1)	SF.PBG47(1)tract	SF.PBG49(1)tract
MSA/MD Median Household Income	B19013(1) at MSA level/Calculated from B19001 As necessary	SF.PBG47(1)state	SF.PBG49(1)state
Families, Count	B19101(1)	SF.PBG65(1)	SF.PBG71(1)
Median Family Income (tract level)	B19113(1)	SF.PBG66(1)tract	SF.PBG72 (1) tract
MSA/MD Median Family Income	B19113(1) at MSA level/Calculated from B19101 As necessary	SF.PBG66(1)state	SF.PBG72(1) state
Total Housing Units, Urban	Not Available	SF.H2(2)	SF.H2(2)
Total Housing Units, Rural	Not Available	SF.H2(5)	SF.H2(5)
Total Housing Units, Occupied (Occupancy Status)	B25002(2)	SF.H3(2)	SF.H3(2)
Total Housing Units, Vacant (Occupancy Status)	B25002(3)	SF.H3(3)	SF.H3(3)
Total Occupied Housing Units, Owner Occupied (Tenure)	B25003(2)	SF.H4(2+3)	SF.H4(2+3)
Total Occupied Housing Units, Renter Occupied (Tenure)	B25003(3)	SF.H4(4)	SF.H4(4)
Total Population, Urban	Not Available	SF.P2(2)	SF.P2(2)
Total Population, Rural	Not Available	SF.P2(5)	SF.P2(5)
MSA/MD Median Family Income Percentage	B19113(1) tract/ B19113(1) MSA	SF.PBG66 (1)tract/ SF.PBG66 (1)state	SF. PBG72 (1)tract / SF. PBG72 (1)state

Small county flag, demographic data flag and urban/rural flag will contain 'I' for the Island Area tracts.

System Title: HMDA/CRA  
Descriptive File Name: Census File Format for use with 2018 HMDA/CRA Data  
Notes: ACS indicates the data source is the 2011-2015 American Community Survey; Other indicates the data source comes from data other than one of the files provided by the Census Bureau (check Appendix for more information); NA indicates the data is not included in the file but is still present in the index for compatibility reasons.  
Data Type column: AN – alphanumeric (character); N – numeric (zoned decimal)

**Other - Board Calculated**

Index	Description	Max Length	Data Type	Data Source	Source Field
1	Key field. HMDA/CRA collection year	4	AN	Other	
2	Key field. MSA/MD Code	5	AN	Other

## **APPENDIX**

### **FFIEC Census 2018**

**(Last updated June 2018)**

#### **BACKGROUND:**

Each year, the U. S. Census Bureau compiles geographic and demographic data from a sample of the United States and releases it in the form of the American Community Survey. The Federal Reserve System takes a subset of the data and creates calculated fields where appropriate for HMDA/CRA, Fair Lending, and research use. The resulting FFIEC Census File is used in many areas of the Federal Reserve System and is also made available to the public.

#### **Data Extraction**

Data were obtained from the 2011-2015 American Community Survey archives downloaded from the U. S. Census Bureau FTP site with the corresponding technical documents. The American Fact Finder on the U. S. Census Bureau web site was used to verify both the extracted and calculated fields.

Data for the Island Areas were obtained directly from the 2010 Island Area Summary Files on the U. S. Census Bureau website.

#### **DEFINITIONS:**

##### **Metropolitan Areas**

On August 15, 2017 OMB released an update to MSA/MD delineations that are incorporated in the 2018 FFIEC Census file.

Refer to <https://www.census.gov/geographies/reference-files/time-series/demo/metro-micro/delineation-files.html> and <https://www.whitehouse.gov/omb/information-for-agencies/bulletins> for the latest updates.

##### **Counties (and Statistically Equivalent Entities)**

Each county and statistically equivalent entity defined by the U. S. Census Bureau, is assigned a three-digit Federal Information Processing Standards (FIPS) code that is unique within state. These codes are assigned in alphabetical order of county or county equivalent within state, except for the independent cities, which are assigned codes following the county codes.

The U. S. Census Bureau's web site ([www.census.gov](http://www.census.gov) Census Geography Reference Resources) has more information on counties.

##### ***Small Counties***

With the 2000 Census, all counties are tracted. Small counties with no more than 30,000 inhabitants, for purposes of HMDA, are rolled up to the county level and assigned tract number 9999.99. Thus, in the FFIEC Census File, a small county with 12 census tracts will have 13 tracts with the small county's MSA/MD-State-County combination: 12 census tracts and one small county tract number 9999.99.

***County Exceptions***

***Crawford County, MO –***

OMB lists Sullivan City, Crawford County, MO as part of the St. Louis, MO-IL MSA/MD (41180). The Bureau of Census Lists Crawford County, MO as unclassified. HMDA will continue to classify it as non-metro.

***Broomfield County, CO***

Broomfield County, CO became a county with the 2004 FFIEC Census File

***Clifton Forge, VA***

Clifton Forge, VA was removed as a county-equivalent and included in Alleghany County as a town with the 2004 FFIEC Census File. Refer to <http://www.census.gov/geo/www/tiger/> for Alleghany County tract listing.

***Skagway-Hoonah-Angoon Census Area, AK***

Skagway-Hoonah-Angoon Census Area, AK (02-232) was deleted and split to create two new counties: Skagway Municipality, AK (02-230) and Hoonah-Angoon Census Area, AK (02-105). Refer to <http://www.census.gov/geo/www/tiger/> for tract listings of the new counties.

***Petersburg Borough, AK***

Changed county name for Alaska county (02-195) from "Petersburg Census Area" to "Petersburg Borough". Refer to <https://www.census.gov/geo/maps-data/data/tiger-line.html> for tract listing.

***Bedford City, VA***

Bedford (independent) city, Virginia (51-515) changed to town status and was added to Bedford County (51-019). Refer to <https://www.census.gov/geo/maps-data/data/tiger-line.html> for tract listing.

***Wade Hampton Census Area, AK***

Wade Hampton Census Area, Alaska (02-270) changed name and code to Kusilvak Census Area (02-158).

***Shannon County, SD***

Shannon County, South Dakota (46-113) changed name and code to Oglala Lakota County (46-102).

## **Tracts**

Census tracts are small, relatively permanent statistical subdivisions of a county or statistically equivalent entity. The primary purpose of census tracts is to provide a stable set of geographic units for the presentation of decennial census data. The 1990 census had some counties with census tracts and others with Block Numbering Areas (BNAs). For Census 2000, all BNAs were replaced with census tracts, which may or may not represent the same areas. For the 2010 Census, the Census Bureau drew new tract boundaries that do not necessarily coincide with Census 2000 tract boundaries. After the 2010 Census, the Census Bureau released corrections to tract codes and boundaries that were defined in the 2010 Census. These corrections are included in the 2017 FFIEC Census file as a part of the switch to the 2015 ACS as a basis for the file. These corrections are listed in the geography notes section of this document.

Census tracts are identified by a four-digit basic number and a two-digit numeric suffix; for example, 6059.02 and 7099.00. In the FFIEC Census File, the tract is six digits with an implied decimal point (e.g. 605902 and 709900).

The U. S. Census Bureau's web site ([www.census.gov](http://www.census.gov)) has more information on tracts.

## ***Special Tracts***

The U. S. Census Bureau reserves the basic census tract numbers 9400.00 to 9499.00 for census tracts delineated within American Indian reservations and off-reservation trust lands that exist in multiple states or counties.

The census tract numbers in the 9900s range identifies underwater tracts. These tracts have been included on the FFIEC Census File.

## **Flags**

All flags are one-character fields that give information about a tract.

### ***Principal City Flag***

The 2010 standards from the Office of Management and Budget (OMB) define metropolitan statistical areas, metropolitan divisions, and principal cities. A principal city is essentially the same as the former central city.

In each MSA/MD, the largest place and, in some cases, one or more additional places are designated as "principal cities" under the official standards. A few MSA/MDs do not have principal cities. The largest principal city and, in some cases, up to two additional principal cities, are included in the title of the MSA/MD; there also are principal cities that are not included in an MSA/MD title. The list of principal cities is provided by OMB. If any part of a tract on the FFIEC Census File is in a principal city, the entire tract is flagged as such. The Principal City Flag field has two possible values: '0' indicates that it is not a principal city tract and '1' indicates that it is a principal city tract. For small counties (tract = '999999'), if at least one tract in the county is in a principal city, then the small county record is flagged as being in a principal city.

### ***Small County Flag***

For HMDA purposes, the definition of a small county is a county with a total population less than or equal to 30,000. Note: for CRA purposes, the figure is 500,000. The Small County Flag is calculated on the total population of the county in which a tract lies. The Small County Flag has three possible values: ‘T’ indicates a tracted county (non-small county); ‘S’ indicates a small county; and ‘I’ indicates an Island Area.

### ***Split Tract Flag***

The 2018 FFIEC Census File does not contain any split tracts; therefore, this flag will always be ‘N’.

### ***Demographic Data Flag***

The Demographic Data Flag indicates the presence of demographic data. An “X” in this field indicates that persons/population and/or the tract median family income data are zero or suppressed by the U. S. Census Bureau for reasons of confidentiality. A “D” in this field indicates that the persons/population and the tract median family income are both non-zero. An “I” in this field indicates an Island Area.

### ***Urban/Rural Flag***

Census defines Urban ‘U’/Rural ‘R’ for blocks not for tracts. A third designation of Mixed ‘M’ defines a tract containing blocks that are both urban and rural. If a tract contains blocks that are all Urban or all Rural, it is flagged as ‘U’ or ‘R’, respectively. An “I” in this field indicates an Island Area.

### ***Distressed or Underserved Middle Income Nonmetropolitan Tract Flags***

Starting in 2006, the FFIEC Census file carries seven flags relating to CRA Distressed or Underserved Criteria:

- Distressed Criterion - Poverty Rate Flag
- Distressed Criterion - Unemployment Flag
- Distressed Criterion - Population Flag
- Underserved Criterion – Remote Rural (Low Density) Flag
- Carried from Previous Year - Distressed Flag
- Carried from Previous Year - Underserved Flag
- Distressed or Underserved Tract Flag

Possible values for these flags are: ‘X’ – meets criterion and ‘ ’ (blank space) – does not meet criterion. The “Carried from Previous Year - Distressed” flag indicates whether or not the tract met one or more of the three distressed criteria on the previous year’s file. The “Carried from Previous Year - Underserved” flag indicates whether or not the tract met the underserved criterion on the previous year’s file. The “Distressed or Underserved Tract Flag” indicates whether or not the tract is considered a CRA Distressed or Underserved Middle Income Nonmetropolitan Tract. It is flagged with an ‘X’ if any of the other six flags are

flagged with an ‘X’. For details on the calculation of the three distressed criteria (Poverty, Population, and Unemployment) and the one underserved criteria (Remote Rural (Low Density)) see the “Source Information and Methodology” PDF at <http://www.ffiec.gov/cra/examinations.htm>.

## Medians

### ***MSA/MD (or Statewide Non-Metro) Median Family and Median Household Incomes***

On August 15, 2017 OMB released an update to MSA/MD delineations that are incorporated in the 2018 FFIEC Census file. Due to the implementation of the new OMB delineations, the FFIEC has recalculated the MSA/MD Median Family and Household Incomes in the cases where a MSA/MD boundary change has occurred and the data is not available from Census. The following sections give details of the methodology used for deriving the MSA/MD Median Family and Household Incomes. Please note that all tables used below are from the 2011-2015 ACS dataset to be consistent with the rest of the FFIEC Census file:

#### ***MSA/MD (or Statewide Non-Metro) Median Family Income***

- If a boundary remains the same after the OMB revisions, the Median Family Income is directly from Census ACS table B19113 at the MSA/MD (or Statewide Non-Metro) level.
- If a boundary change has occurred and the MSA/MD (or Statewide Non-Metro) contains a single county, the Median Family Income is directly from Census ACS table B19113 at the county level.
- If a boundary change has occurred and the MSA/MD (or Statewide Non-Metro) contains multiple counties, the Median Family Income is calculated from ACS table B19101 using Pareto Interpolation, since the data is not available from Census<sup>1</sup>.

#### ***MSA/MD Median Household Income***

- If a boundary remains the same after the OMB revisions, the Median Household Income is directly from Census ACS table B19013 at the MSA/MD (or Statewide Non-Metro) level.

---

<sup>1</sup> As was the case with the 2000 Census, FFIEC calculated MFIs will differ slightly from the figures published by the U.S. Census Bureau. This is because the internal tabulations used by the U.S. Census Bureau to create ACS MFI and median household income estimates contain finer gradations than the versions of the tables released to the public by the U.S. Census Bureau. Also note that the FFIEC does not calculate the margin of error.

- If a boundary change has occurred and the MSA/MD (or Statewide Non-Metro) contains a single county, the Median Household Income is directly from Census ACS table B19013 at the county level.
- If a boundary change has occurred and the MSA/MD (or Statewide Non-Metro) contains multiple counties, the Median Household Income is calculated from ACS table B19001 using Pareto Interpolation, since the data is not available from Census.<sup>1</sup>

### ***FFIEC Estimated Median Family Income (MFI)***

In general, the FFIEC Estimated MFI is derived by using the U.S. Department of Housing and Urban Development's (HUD) methodology published on its website (<https://www.huduser.gov/portal/datasets/il.html>). For Fiscal Year (FY) 2018, HUD continues to use the Metropolitan Statistical Area/Metropolitan Division (MSA/MD) delineations released by the Office of Management and Budget (OMB) in February 2013, due to HUD's use of the American Community Survey (ACS) 2015 estimates as a basis for the FY 2018 MFIs. However, since the 2015 ACS estimates do not include the OMB's August 2017 revisions to the MSA/MD delineations, the following geographies were calculated by the FFIEC:

- MSA: Enid, Oklahoma (MSA 21420, consisting of Garfield County, code 047)
- Non-Metro Area of Oklahoma
- MSA: Twin Falls, Idaho (MSA 46300, consisting of Twin Falls City, code 82810; Jerome County, code 053 and Twin Falls County, code 083)
- Non-Metro Area of Idaho

In summary, the FFIEC uses the following methodology when deriving the FFIEC Estimated MFI values for FY 2018:

#### ***MSA/MDs (or Statewide Non-Metro areas) whose boundaries were not changed by the OMB revisions:***

In the areas where MSA/MD (or Statewide Non-Metro areas) boundaries remain the same after the July 2015 OMB revisions, the MFI for the FFIEC Estimated MFI is taken directly from HUD.

#### ***MSA/MDs (or Statewide Non-Metro areas) whose boundaries were changed by the OMB revisions:***

In the areas where the MSA/MD (or Statewide Non-Metro areas) boundaries were changed by the July 2015 OMB revisions, the following methodology is used to calculate the FFIEC Estimated MFI values:

1. In accordance with HUD's methodology, the U.S. Census Bureau's 2015 ACS 1-Year and 5-Year Estimates are used as a basis for FY 2018 Estimated MFIs. Please note that the ACS 1-year estimates are only available for geographies with populations of 65,000 or more. Therefore, not all county components of the MSA/MDs defined by OMB are available in the in the ACS 1-year dataset. If all counties in an MSA are available in the ACS 1-year dataset, then the ACS 1-year dataset is used as the basis for the Estimated MFI. Otherwise, the ACS 5-year dataset is used.
2. **1-Year ACS:** If the new MSA/MD boundary is comprised of a single county and is available in the 1-year ACS, then the 2015 ACS 1-Year Estimated MFI is pulled directly from the Census (table B19113) at the county level. If the new MSA/MD boundary is comprised of multiple counties that are all available in the 1-year ACS, the FFIEC recalculates the 2015 ACS 1-year Estimated MFI (from ACS table B19101 using Pareto Interpolation) since the data is not available from the U.S. Census Bureau.**Error! Bookmark not defined.Error! Bookmark not defined.**
3. **5-Year ACS (if not available in 1-Year ACS):** If the new MSA/MD boundary is comprised of a single county, then the 2015 ACS 5-Year MFI is pulled directly from the Census (table B19113) at the county level. If the new MSA/MD boundary is comprised of multiple counties, the FFIEC recalculates the 2015 ACS 5-year MFI (from ACS table B19101 using Pareto Interpolation), since the data is not available from the U.S. Census Bureau. **Error! Bookmark not defined.**
4. Once the appropriate Estimated MFI has been selected, an inflation factor based on the Congressional Budget Office forecast of the national Consumer Price Index is calculated to bring the estimate from mid-2015 to April 2018, in accordance with HUD's methodology. The Estimated MFI is then rounded to the nearest \$100.

## Interpolation Methods

Two methods are used to calculate medians in the FFIEC Census File: **Pareto interpolation** and **linear interpolation**. Pareto interpolation is used to calculate income medians (median family incomes and median household incomes). Linear interpolation is used for all other types of medians such as median housing age and median person age.

The U. S. Census Bureau's web site ([www.census.gov](http://www.census.gov)) has more information on interpolation.

### **Income Level Indicator**

Income level indicator identifies each census tract as not available, low, moderate, middle or upper. It is determined from the tract median family income as a percentage of the MSA/MD median family income (tract median family income / MSA/MD median family income).

The codes are:

0 -- **Not Available:** if tract median family income = 0

1 -- **Low:** if tract median family income is > 0% and < 50% of the MSA/MD median family income

2 -- **Moderate:** if tract median family income is >= 50% and < 80% of the MSA/MD median family income

3 -- **Middle:** if tract median family income is >= 80% and < 120% of the MSA/MD median family income

4 -- **Upper:** if tract median family income is >= 120% of the MSA/MD median family income

### **Puerto Rico/Island Areas**

Puerto Rico and the United States both have 2011-2015 ACS surveys. Therefore, data including minority population are available for Puerto Rico. The Island Areas use different surveys than the U.S.; therefore, population and housing items may come from different census table numbers. The 2018 FFIEC Census File does include demographics for population and housing items for Island Areas. See the [Island Area table](#) for more details.

### **1-4 Unit Subtotal**

The "1-4 unit subtotal" field is derived by adding up all single attached units, single detached units, 2 units, 3 or 4 units, mobile homes, and Boats, RV, vans, etc. Census defines mobile homes, boats, RVs and vans as living quarters occupied as housing units if they are considered a person's permanent residence, and are not used exclusively for recreation.

### **Numeric Field Width on FFIEC Census File**

Eight-character field width is the standard for most numerical values in the FFIEC Census File. This is justified since the largest number represented is approximately 38 million, the population of California.
